Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: examiner called to confirm that she got the response to the rule 105 request. She noted that there would be at least a 112 2nd issue with the composition claims, as it is not indicated anywhere whether the composition is weight or volume percent. Also, while searching, the percentages seem very different from what was found, and examiner wondered if any of the materials should have a content as just the fraction, not the fraction and percent sign -- for example, Ni of 0.18% is 0.0018 Ni, or approximately 2/10s of 1 percent. Examiner wonders if applicant intended either 18% or 0.18. Examiner noted that the spec has the same descriptions, and thus any change would be new matter unless it can be documented that it is due to a translation error from the French language parent..
